

# OMPH School Scene

## Fourth Grade at OMPH School

What a difference a few months make! Normally, the fourth graders at OMPH would be in our classroom spelling new words, reading stories, working out math problems, experimenting in the science lab, and exploring Pennsylvania. The students would attend special classes like Spanish, PE, art, library, computer, and music. In religion, we would be celebrating the risen Christ and all that Easter means to our faith.

Since the Corona virus has closed our school buildings, students are learning in a different way. The content isn't new, but the way we are learning has changed! Distance learning has become our new normal. Teachers are preparing lessons at home and teaching online. I am sure that many dining rooms have turned into classrooms as students are working at home along with their parents. It is a new experience for all of us.

Students miss interacting on the playground with their friends, having lunch together, and sharing stories with each other every day. However, there is a positive side to learning at home. Children are spending more time with their families. Teachers and parents are working as a team supporting each other more than ever. We are thankful for our parents who support us in this endeavor. Adjusting to the new normal isn't easy, but we are doing it by all working together. May God bless you and keep you until we meet again!
